CENTRE FOR THE COMMERCIALIZATION OF MINING TECHNOLOGIES AND SERVICES

Engaging and Developing Canadian Leaders

EXECUTIVE NETWORKS

CENTRE FOR THE COMMERCIALIZATION OF MINING TECHNOLOGIES AND SERVICES

Canada's mining industry has achieved a global presence, but industry suppliers have not fully capitalized on the opportunities offered by the global market. The mining industry is conducting research and development into various technologies that will improve the efficiency of mining activities, and will address the sector's environmental stewardship challenges. However, these emerging technologies are not reaching their full potential for commercialization—in Canada, or internationally. The Centre for the Commercialization of Mining Technologies and Services (CCMTS) was established to find solutions for these commercialization and market-channel issues.

Key Objectives

- Provide business intelligence, commercialization tools, and marketing strategies for Canadian mining technology and service providers to increase their competitiveness in domestic and global markets.
- Foster collaboration within the industry by breaking down barriers and working across industry silos—in particular, those related to the commercialization of technologies and technology-based services.

EXCLUSIVE BENEFITS OF MEMBERSHIP

- Participation in two annual meetings in cities across Canada.
- The opportunity to develop action plans and strategies to improve the competitiveness of Canadian mining technologies and services providers, as well as to constructively influence public policy.
- Access to a full range of Conference Board and CCMTS research and information services, tailored to meet the needs of members.
- Access to a members-only website with links to past meeting notes and listings.

Who Should Join

CCMTS is ideal for senior executives from all relevant sectors—including mining companies, providers of technologies and services, academics, associations, and governments at all levels.

Member Organizations

3M Canada Company
3M Mining & Mineral Extraction EBO
Accurassay Laboratories Ltd.
CAMESE—Canadian Association of Mining
Equipment and Services for Export
Cubex Limited
Mining Technologies International Inc.
Rockwell Automation Canada Inc.
Saskatchewan Institute of Applied Science
and Technology (SIAST)
Saskatchewan Research Council
The Northern Centre for Advanced Technology Inc.
Vale Manitoba
