Global Outlook

COVID-19 Driving Synchronized Global Slowdown
COVID-19 Impacts

- Direct impacts through production shutdowns and steep drop in consumer spending
- Global tourism spending will take a hit but it’s a net zero
- Halt to air and other passenger transportation lowered fuel demand and oil prices
- Impact on global supply chain will be noticeable
- Fear factor, consumer and business confidence, can exacerbate impacts
- Risk to financial markets, especially if outbreak is not contained quickly
World Economy in the Grips of a Major Downturn

• In January we expected global GDP to expand by 2.6 per cent—close to potential growth

• Devastation caused by coronavirus and steps to limit the spread will lead to a gain of only 1.7 per cent this year

• Output in China contracted sharply in January and February—real GDP growth for the entire year will be less than 4 per cent

• Italy, France, Germany, Spain and Japan likely to experience recessions in 2020

• All governments engaging in massive fiscal and monetary stimulus—will it be enough?

U.S. Outlook

Unprecedented fiscal stimulus to avert election-year recession
Recent indicators Capturing Devastation in U.S. Economy

• U.S. box office sales for top 10 movies 50 per cent below averages in 2018-19

• Seated diners in restaurants down 80 per cent from a year ago

• Weekly jobless claims increased by 70,000 to 281,000 for week ending March 14

• Declines in equity markets have wiped out all the gains since President Trump took over

• Major auto manufacturers have shut down operations
U.S. Fiscal Response

• Congress ready to pass a $1.3 trillion stimulus package
• $50 billion for the airlines
• $300 billion for small businesses
• $150 billion for other sectors like energy devastated by plunge in oil prices
• $500 billion direct payment to all Americans—roughly $1,000 each
• Deferred tax payments for businesses and individuals
Consumption Shock will Hurt U.S. Economy

World Oil Prices in Freefall

• Combination of collapsing demand linked to coronavirus and Russia and Saudi Arabia fight for market share sent world oil prices plunging to US$23 per barrel—in January WTI was as US$63 per barrel

• Russia has promised to boost production by 500,000 bpd while Saudis plan to bring full excess capacity of 2.3 million bpd online—incredible excess supply on global markets in midst of collapsing demand

• Saudis offering Russia’s customers steep discounts in Europe and elsewhere

• Russia may be able to outlast Saudis—government says it could survive on $25-$30 oil for six years, but should we believe Putin?

• Saudis need at least $80 oil to balance budget

• Shale producers need around $40 oil so many won’t survive unless big bailout rescues them

Labour Market

Coming off a Record Year
2019—A Boon Year for Labour Markets

• Many developed economies are feeling the pinch of labour constraints and Canada is no exception

• 390,000 jobs were created in 2019, growth of 2.1 per cent

• In May 2019, Canada’s unemployment rate bottomed out at 5.4 per cent, a record low since the current labour force survey was launched in 1976

• Over the entire year, the unemployment rate averaged a record low of 5.7 per cent

• Job vacancies swelled to 563,000 in the third quarter

• Despite record immigration levels and rising labour force participation, the private, non-farm average hourly wage soared by an estimated 4.7 per cent—2.8 percentage points above inflation!

• Employment growth was strong through to February 2020…but March EI claims topped 500,000

Policy Measures to the Rescue

Pulling back the slingshot
Monetary Stimulus Leans on Easier Credit

- Bank of Canada cuts its overnight rate by 50 basis points on March 4th and then another 50 basis points on March 13th.

- OSFI dropped its *domestic stability buffers*—essentially reserve requirements—creating an additional $300 billion in lending capacity.

- The GoC re-introduced the Insured Mortgage Purchasing Program (IMPP) to buy up to $50 billion of insured mortgage through CHMC to ensure banks and mortgage lenders remain well funded.

- The BoC will also purchase CMBs (Canadian Mortgage Bonds). Plans to buy up to $500M in CMBs per week.

- GoC announced $10 Billion in additional loans through EDC and BDC and another $7.1 billion in loans to businesses.
Fiscal Measures to top 3 Per cent of GDP

- On March 18th, the Federal Government announced an $82 billion rescue package amounting to 3.3 per cent of GDP

- $27 billion in direct support to workers and businesses
  - Boost EI payments and insure those that do not qualify ($900 weekly)
  - Top up child benefits $300 per child and GST credit for modest income families ($400 individuals, $600 couples)
  - Small businesses will get a 10% wage subsidy for three months

- $55 billion in tax deferrals for businesses and households—taxes deferred to August and student loan payments deferred for 6 months, no interest

- Provincial/Territorial/Municipal governments and crown corps also providing support

• Global economy will feel the effects of COVID-19—a recession is likely in many countries

• Canada and the United States went into February 2020 on a solid footing but things have deteriorated precipitously

• Economic impact will depend entirely on our success (in Canada and the United States) at containing the outbreak

• Tourism, accommodation and food, entertainment and recreation, oil patch and manufacturing will suffer sharp declines

• Consumer spending, especially on durable goods, should rebound quickly once the crisis is over
How might COVID-19 change the world…

• *Weiji*—turn a challenge into an opportunity

• Using technology for education, doctor visits, telecommuting

• Permanent boost to online sales and the digital economy

• Supply chains shortened—kept within the domestic economy

• Deeper debt for households, governments and businesses—re-emergence of sovereign debt issues
